THE object of the Company is to form and maintain a factory in Yokohama for the Manufacture of Watches of all kinds and descriptions.

The founders of the Company are possessed of a plant of machinery complete in every particular, of the newest design and the finest workmanship, and adapted for the making of all implements used in the watch trade as well as the making of watches. It is well known that machinery has effected a complete revolution in the watch trade and it is confidently expected that by availing itself of the comparatively cheap labour of this country this Company will be able to supply the trade in all parts of the world with an article which for excellence of workmanship and cheapness of price will defy competition.

Mr. P. H. Wheeler, the Superintendent of the Company, has been for many years engaged in developing watch-making machinery, and the testimonials from his former employers testify to his business ability, skill, and integrity. The machinery of which the founders are possessed has been perfected under his superintendence, and a considerable part thereof is of his invention.

Besides the Machinery, the founders are possessed of ten thousand watches in various stages of completion, which are the outcome of the said Machinery; and material on hand sufficient to turn out about twenty-five thousand more. It will thus be seen that it is not an untried plant which the founders have acquired, but one which has already given proofs of its excellence. It was only the advantage of obtaining a cheaper labour market than can be found in the United States that has induced them to work the business in Japan.

It is an established fact that the principal factories in the United States in seven years paid 300 per cent. dividend on a capital of Six Million Dollars; and that was done on a wage basis of \$1.50 (gold) per operative, the factories employing six thousand hands. If the difference in the rate of labour in this country is taken into consideration the operations of the Company will be assured to realise to the full the expectations of the founders. The profits of watch-making are based entirely on the price of labour.

It is not in the labour market only that an advantage will be obtained. Coal and other materials can be purchased in this country at a lower rate than in the United States. And besides all these advantages, which are great, there is one of still greater importance, the knowledge to be obtained of the requirements of the local trade, of the trade for China, and that of "The Straits" and India. The Company will be capable of supplying a watch of the best workmanship to the population of these large and important countries at a price far below any watch of like character that has ever been offered to these markets.

Taking into consideration these advantages the founders confidently expect to pay a dividend of at least 10 per cent. per annum on the first two years' work and thereafter dividends at a much higher rate.

The Company has been registered in Hongkong as a Limited Company.

The founders take and acquire 30,000 shares of the stock of the Company in payment for the machinery plant and stock and their labour and experience in preparing and procuring the machinery and stock.

Ten thousand shares of twenty-five yen each are offered for subscription.

The memorandum and articles of association of the Company may be inspected at the offices of the Company, No. 10 Bond, Yokohama.

Applications for shares should be made on forms annexed to the Prospectus and should be forwarded to the Hongkong and Shanghai Banking Corporation accompanied by a remittance for the amount of the deposit.

Forms of application will be sent free to any person, by addressing the Head Office, 10 Bond, Yokohama.
